

Eurosatory 2008 – Salon International De La Defense

sonUtec occupied its own booth there. Companies exhibiting there usually use this fair to show their military defense equipment. SonUtec shows off its ammunition disposal equipment.

SonUtec has delivered many plants for ammunition disposal worldwide in the last years. Our presentation of new developments in the field of kiln technology and flue gas treatment was a big success.

We managed interesting meetings with our partners and known business friends and made many new contacts all over the world.

We collected interesting information about the disposal market for ammunition and explosives.
